# ELECTROCARDIOGRAPHS

Think different, **be** different

PROGETTIMEDICAL.COM

## EPG Project

Compact 1-3 channels electrocardiograph with something more. Thanks to its touch screen display, this electrocardiograph becomes a simple diagnosis device, even for the most complicated cardiac diseases. With its color display and its 80mm thermal printer, EPG Project is a high-performance electrocardiograph. Its parameter calculation and ECG interpretation software help the non-expert user make a correct diagnosis.

## EPG Junior

Always easy to carry around. One of the smallest printer-integrated electrocardiographs in the world, this device is the ideal partner for the professional who favors compactness and simplicity. EPG Junior fits into the doctor bag or his dedicated transportation bag. This simple and intuitive 3 channels device will allow you to use a classic electrocardiograph everywhere.

The classic PROGETTI electrocardiograph, icon of reliability and precision. Thanks to its high resolution display, this small 3 channels will allow you to analyze an ECG even without printing it. Thanks to its thermal printer, EPG View allows you to use additional functions such as parameter calculation and a base level interpretation for the non-specialist doctor.

## EPG View

## EPG 6 View

From the same product line of the 3 channels model, this electrocardiograph allows you to use a very small 3/6/12 channels. Equipped with a simple and fast interface, the EPG 6 VIEW model is conceived for the operators who need everything in a narrow space.

A new generation electrocardiograph thanks to its dimensions, EPG 6 View Plus, 6/12 channels, is the ideal device for the general practitioner, but also for the specialist and his needs. Thanks to its compact keyboard, this device will allow the doctor to draw up the database in real time and to upload the data on his computer. Parameter calculation and HES interpretation make EPG 6 View Plus the ideal electrocardiograph in every situation.

## EPG 6 View Plus

## EPG 12 View

Top-of-the-range electrocardiograph, thanks to its 8.4" touch screen display this device fulfills the expectations of every cardiologist. Main features: data storage, report management software, interpretation and different visualization. EPG 12 View is conceived for those who want the electrocardiography to be the distinguishing feature of their job.

We have been developing products for the prevention and treatment of heart diseases for more than 25 years. Thanks to an international network and to our presence in more than 60 countries all over the world, we commit ourselves to providing the best Italian technology in the medical field.

Looking into the future with enthusiasm  
is the way to create innovative instruments.

Being the ideal partner for those who want to make  
a better world with their work is our purpose.
